

How To Start Printing GSM Recharge Vouchers And Make Huge Profits

No part of this Publication should be reproduced without permission from the Publisher.

INTRODUCTION

You may recall that the Government banned the importation of GSM recharge cards/vouchers printed in foreign countries. This has opened up the industry to all players, both big and small.

The business is all about you being a small to medium player, a mini franchisee! It is 100% legal; you are going to be dealing with companies that are licensed by NCC.

Imagine if a distributor can print and distribute just 5,000 of those fast selling N500 vouchers on a daily basis. Even at a profit say N10 per card, that company would be making profit of about N1.5million a month just selling recharge cards.

WHAT DO I NEED TO START?

The things you need to start with are:

• OPTION 1

1. A Computer (You can buy any computer of your choice)
2. A Printer (LaserJet or DeskJet printers)
3. Software that generates the pin numbers (this will be installed in your Computer)
4. Bulk pin (this you will be buying to generate your pin numbers)

• OPTION 2

Just one Device called orange box. No need for computers or software. Get details in the starter kit below.

OPTION 3

No need for Orange box, no need for your personal computer, no need for software! Get details in the starter kit below.

WHERE DO I GET THE SOFTWARE

The software is included in the gsm recharge voucher printing starter kit. You shall find out how to get the starter kit at the bottom of this page

BULK PINS AND AT WHAT PRICES

The sources from cities all over the country where you can get the pins are included in the gsm business starter kit below. It is then left for you to choose anyone of your choice.

HOW MUCH PROFIT CAN I MAKE?

For example if you make just N5 per voucher and you are able to sell 1,000 pieces via your distribution network; your profit would be N5, 000/day, which equates to about N150, 000/month!!

For those who are already in the business, you know that selling 1,000 pieces is not a big deal.

Dare to think of how much you would make selling 5,000 – 10,000 per day! You would be raking in “insane” piles of cash: N25, 000 – N50, 000/day, equating to N750, 000 – N1, 500,000 per month!!

In summary, your profit is dependent on your market share and initial investment.

Who Can Benefit From The Business

GSM voucher business is simply a market based business. That means it’s about selling something and that way anyone can be involved.

Welcome to a great GSM news that will put money into your pocket.

WHAT IF I DON’T LIVE IN LAGOS OR BENIN CITY.

The business can be done from any part of the country (even in your village)! If you do not have email or internet access, you can choose the 3rd option and have the vouchers sent to you by courier.

HOW TO GET STARTED

The business has been packaged into a simple step by step module, titled “**GSM VOUCHER BUSINESS STARTER KIT**”.

It consists of an e-book, software for printing vouchers, user guide, bonuses (see below).

The Starter kit includes the following:
